from chapter to chapter. The experience relies on story cards and panels as 7 pages of text would have been to taxing on the reader.HTML took a backseat for anything that can be done in CSS as I wanted to focus more on it as the later part of the semester was centred around it.Some of the images offer more than they seem so feel free to hover over them if they peak your interest.If you didnt do that with Genghis already hit the top button and that will bring you back to him.Otherwise without any further delay I hope I picked your interest enough for you to click Next Page and lets start ... <div class="ButtonBanner"> <!-- Banner Button for navigation --> <div class="Button" ><a href="#Top">Top of page</a></div> <div class="Button" ><a href="Page2.html">Next Page</a></div> </div> </div> </section> <section class="GridSub4"> <!-- Contains one of several "Paper Panels" this one has the mongol script alphabet on it, decided to use</pre> <div class="PaperPanel"> <!-- external container --> <div class="Paper"> <!--internal container --> **₹ ∓** ₽ र म अ र न के 1 W **₹** ∓ ₹ **₹ ∓** ₹ </div> </div> </section> </div>

<br>Hello, dear user the hardest thing I found in this assignment (apart from CSS layout) was its subject. I don't

really have a hero as all of us are capable of being heroes in the right circumstances. That's why I chose to centre my website around someone I find interesting instead. I chose a historical person because I really wanted to make a site with an old time-feel.With this project I tried to mimic a book (or more like a graphic novel).The flow is from page to page and the menu on top gives the option to jump
