

Aleksandar Tsankov Mladenov

Software Engineer | Junior Java Developer

Dublin, Ireland | +353 89 448 2796 | alex.t.mlad@gmail.com | portfolio: meetalex.org | [LinkedIn](#) | EU/EEA Citizen (Bulgarian National)

PROFESSIONAL SUMMARY

Software Engineer with a background spanning full-stack Java development and hands-on financial services experience in digital risk, data governance, and operational controls. Currently working as a Junior Java Developer at Version 1. Building enterprise-grade public sector applications. Strong foundation in IT and an even stronger foundation to learn.

TECHNICAL SKILLS

Java / Spring Boot	PHP	Python
Angular / TypeScript	SQL / Oracle DB / MySQL	
AWS (Cloud Practitioner)	Git / GitHub / GitLab	
HTML5 / CSS / JavaScript	Jira / Agile / Scrum	

WORK EXPERIENCE

Associate Consultant — Junior Java Developer

Version 1 | August 2024 – Present | Dublin, Ireland

Assigned to a public sector engagement at the Department of Agriculture, Food and the Marine (DAFM), delivering full-stack enterprise applications within an Agile team.

- Designed and developed full-stack features using Java, Spring Boot, Angular, and TypeScript, contributing to mission-critical public sector applications used by government stakeholders.
- Worked with Oracle DB to write, optimize, and maintain complex Java functionality for data retrieval, transformation, and reporting requirements across backend services.
- Participated in data flow design discussions, contributing to the architecture of backend services responsible for processing and routing structured data between systems.
- Delivered features through structured Agile sprint cycles, managing tasks in Jira, attending daily stand-ups, sprint planning, and retrospectives.
- Collaborated directly with technical leads, business analysts, and government stakeholders to translate requirements into reliable, tested software solutions.
- Contributed to issue triage, root cause analysis, and resolution of production defects, improving system stability and data integrity.

Digital Risk Containment Officer

PTSB (Permanent TSB) | March 2018 – August 2024 | Dublin, Ireland

Part of the Digital and Direct Distribution risk team, responsible for identifying, investigating, and containing operational and data risk events across the bank's IT systems and digital channels.

- Risk Event Management - Identified, logged, and investigated risk events across banking operations with a focus on IT systems, digital processes, and data integrity incidents, providing structured analysis to prevent recurrence.
- Data Breach Investigation - Led end-to-end investigations into data breach incidents within Digital and Direct Distribution, including lost, compromised, or exposed customer records coordinating remediation and regulatory reporting actions.
- Control Testing & Risk Assessment - Supported control testing programs to evaluate the effectiveness of operational controls across IT systems and digital processes, identifying gaps and reducing exposure through structured risk mitigation plans.
- Data Governance Exposure - Developed working knowledge of data handling, classification, and regulatory compliance requirements within a regulated banking environment relevant to financial data quality and governance standards.
- Complaints & Issue Triage - Adjudicated customer complaints linked to digital services and system-driven failures, collaborating with resolution teams to minimize customer and business impact.
- Stakeholder Engagement - Worked cross-functionally with IT, compliance, legal, and business teams, translating technical risk findings into clear reporting for senior management.

EDUCATION & CERTIFICATIONS

BSc (Hons) Computing Science

Griffith College Dublin | 2020 – 2024 | Dublin, Ireland

Graduated 2024. Core modules included software engineering, databases, cloud computing, and data structures.

Professional Diploma in Financial Advice (QFA) Level 7

Institute of Banking, Ireland | May 2019 – June 2020 |

EFPA European Financial Advisor (EFA)

Institute of Banking, Ireland | Completed |

PROFESSIONAL CERTIFICATIONS

- AWS Certified Cloud Practitioner — Amazon Web Services
- SQL for Data Science — Coursera / UC Davis
- OWASP SAMM Fundamentals — Application Security
- Java Digital Skills Academy — Version 1, Dublin (12-week intensive program)

LANGUAGES

- English — Business fluent
